PROFESSIONAL SUMMARY

Computer Science and Engineering student at Maharaja Institute of Technology, Mysuru with a strong passion for innovation and developing impactful software solutions. Actively exploring emerging tech domains and eager to contribute technical skills and creative thinking to a dynamic team in a challenging development environment.

EDUCATION

Maharaja institute of technology,Mysuru	2022-2026
<i>Bachelors of Computer Science and engineering</i>	<i>Current SGPA:8.5</i>
HKS PU College, Hassan	2020-2022
<i>Pre-university</i>	<i>Percentage-94.8</i>
Aishwarya International Public School,Maddur	2019-2020
<i>Secondary school CBSE</i>	<i>Percentage-80</i>

SKILLS

Programming : Java,C,Python
Developer Tools: Git/GitHub,VS Code
Databases:SQL,PostgreSQL
Development:HTML,CSS,Javascript,React.js,Basics of Machine learning
Coursework:DSA, Object Oriented Programming, Operating System,Computer Networks.

PROJECTS

Fraud UPI transcation detection

Created a prototype system to identify potentially fraudulent UPI transaction patterns and anomalies using Python based statistical methods.

Tech Stack: Python, Pandas, NumPy, Matplotlib.

Pomodoro Stopwatch

Developed a responsive productivity timer based on the Pomodoro Technique to enhance focus and time management. The application features customizable work and break intervals, visual countdowns, and intuitive controls to help users maintain a balanced workflow

Tech Stack: HTML, CSS, Javascript

A Privacy Enhanced Botnet Detection

Developed a privacy-enhanced botnet detection system using machine learning algorithms like Random Forest and SVM to analyze network traffic and identify abnormal patterns. Implemented privacy-preserving preprocessing to ensure data confidentiality while improving model accuracy and reducing false positives.

Tech Stack: Python, Pandas, NumPy, Matplotlib ,Pytorch ,Streamlit , Wireshark.

CERTIFICATIONS

- Hackathon at MIT : Showcased coding skills in a competitive environment.
- Gamethon 7.0 at JIT : Participation in a global event to demonstrate technical skills.
- IBM SkillsBuild:Completion of Artifical Intelligence Fundamentals.
- Be10x:Completion of AI tools and ChatGPT workshop.
